# PACCHETTO

# ROMAN-SHADE SYSTEMS

[www.mottura.com](http://www.mottura.com)

## LAVAGGIO RAPIDO

Dal 1996, data del deposito del primo brevetto specifico, **sistemi per tende a pacchetto** Mottura adottano soluzioni che permettono di rimuovere la tenda con estrema facilità e re-installarla con altrettanta rapidità dopo averne effettuato il lavaggio.

I **rocchetti avvolgitori** sia della gamma **Rotary** che dei sistemi compatti **Softbox** sono progettati per rimuovere il telo unitamente ai suoi nastri/corde di sollevamento, effettuato il lavaggio del telo è sufficiente posizionarlo sul sistema per ripristinare il funzionamento. Questa soluzione ha semplificato molto la manutenzione delle tende a pacchetto permettendo il loro utilizzo sia nel residenziale che nelle comunità.

## FAST WASHING

*Since 1996, when Mottura first patented their **Roman Blind shade System** which allowed the easy removal of the fabric from the system and the ability to re-install the fabric quickly after washing.*

*The **spools** from the **Rotary** range and the **Softbox** systems have been designed so the fabric can be removed with the tapes /lift cords. After washing the curtain, it is easy to position it on the system and restore operation.*

*This solution has significantly simplified the maintenance of the roman shades allowing their use in both residential and commercial locations.*

## DESIGN & FUNZIONALITÀ

Mottura offre **17 diversi sistemi per tende a pacchetto**; dai sistemi per installazione diretta su anta alle soluzioni motorizzate per grandi vetrate.

Il concetto è Design & Funzionalità; il design quale priorità per i sistemi compatti, la funzionalità e la praticità per tutta la gamma.

## DESIGN & FUNCTIONALITY

*Mottura offers **17 different roman shade systems**; solutions for direct installation on to the frame, to motorized systems for large windows.*

*The concept for roman blind systems is Design & Functionality; the design is a priority for the compact systems, the functionality and practicality for the entire range.*

## TENDE DI GRANDI DIMENSIONI

Rotary e Softbox , nella configurazione per grandi tende sono dotati di **meccanismi demoltiplicati** (rapporto 1:4) che riducono lo sforzo dell'azionamento e permettono di azionare tende per grandi superfici.

## LARGE ROMAN SHADES

*The Rotary and Softbox systems for large blinds both have a **gear down drive** (1:4 Ratio). This reduces the effort required to operate a heavy blind.*

## M2NET

È la soluzione sviluppata da Mottura per la gestione dell'home automation. La gamma dei sistemi per tende a pacchetto azionate a motore digitale a basso consumo è **M2net compatibile**.

## M2NET

*It is the solution developed by Mottura for Home Automation Control. The motorized roman shades range is **M2net compatible**.*

## APPLICAZIONI SPECIALI / SPECIAL APPLICATIONS

I sistemi per tende a pacchetto Mottura sono all'avanguardia nel mondo per la loro versatilità.

La gamma offre soluzioni per tende con curve concave o convesse ad ampio raggio, tende con curve ad angolo di 90° anche di rilevanti dimensioni ed anche tende ad arco.

*Mottura roman shade systems are at the forefront of the world for their versatility. The range offers solutions for curtains with concave or convex bends, large radius curves, concave blinds with 90° bends, and it is also possible to have roman blinds in an arch shaped window.*

### ARRESTO BASCULANTE / TILTING STOPPER

L'arresto 4116 è dotato di una piastra di ancoraggio al profilo in alluminio che permette ad esso di inclinarsi sino a raggiungere un orientamento a 90°, quindi parallelo al profilo velcro per installazioni su una volta a semicerchio.

*The tilting stopper 4116 is fitted with one plate of anchorage to the aluminium profile, which allows it to tilt up and reach a 90° orientation, thus parallel to the Velcro® track for installations on a semi-circular ceiling.*
